The Pathos is a stylish, tasteful bollard light, available in a height of 500mm or 800mm; a solid and good-looking lighting solution. Making use of a more elegant design than larger, commercial bollards which can be imposing and dull; these lights really add to their surroundings. Security and energy conscious users have the option of a built in photocell to ensure automatic light when it gets dark and turns itself off when it is light.

The Qubus designs are highly sustainable and robust, providing luxury style to any modern interior or exterior space where exceptionally stylish lighting is required. The LED spotlights are highly efficient compared to standard incandescent bulbs and have an almost indefinite lifespan making them virtually maintenance free. The Qubus outdoor lights, Celestia 60 and Celestia WL easily accommodate Lumina candle or golf ball low energy bulbs; a perfect way to update any exterior or garden. The unique and cutting edge Qubus range are individually crafted from solid aluminium, and have a high quality finish. The aluminium is polished and then coated with a clear lacquer for a distinctly 21st Century look.

OUTDOOR LIGHT FITTINGS

Pro Bollard Range

Robust Outdoor Bollard Lighting
www.lumenalights.com

Lumena Pro Bollards are manufactured to very high standards, and designed to be durable, long lasting and vandal resistant. The two main bollard designs: 'Lighthouse' and 'Fortress' have a high rating of IP65 which means total protection against water and dust. The bollard base or body is made from extruded rust free aluminium and has a wall thickness of 2.5mm. High quality assembly screws are made from stainless steel, (rust free). All of our bollard heads comprise of heavy duty die cast aluminium components, as well as the bollard mounting base and bulb holder assembly. Two versatile and stylish colours are available; traditional Graphite Black or contemporary Garden Green and three different heights 0.6m, 0.8m, or 1.0m, are available. 'Lighthouse' and 'Fortress' Professional Bollards are also available with two head designs; the 'Dome' and 'Pillar', and fit Lumena energy saving GLS bulbs, (as well as standard incandescent bulbs).

Energy Saving Floodlight Lamp (R7s)

Price Ex VAT

£ 10.80

The Luxora energy saver floodlights are high quality aluminium fittings.

There are 5 different lens colour options which help to enhance any environment.

- High quality die cast aluminium body & toughened glass front
- Dichroic Filters *
- IP54
- Main floodlight dimensions 140mm X 180mm X 120mm
- Mirror reflector to increase brightness & efficiency
- 40 Watts - 2400 Lumens (220-240 Volts)
- Virtually as bright as a 200 Watt linear halogen
- 75% to 80% Energy Saving - Energy Rating "A"
- Lasts 8 times as long as Halogen (8000 Hours Life)
- Lamp fits most standard 300w/500w floodlight fittings
- 20,000 switching cycles
- No liquid mercury
- Lamp replaces 117/118mm linear halogen bulbs (R7s)
- Lamp dimensions: 135 x 100 x 52mm
- Daylight white bulb 6400k

* DICHROIC Filters are durable glass filters that transmit only certain wavelengths of light, reflecting the rest of the spectrum rather than absorbing it. As hardly any energy is absorbed by the filter, light transmission is much higher than traditional plastic gels and will never burn out or fade.
